1inch (1INCH)

Note: Coins/Tokens mentioned above are subject to change. In near future we will add/remove the rewards from the pool based on community feedback.

# ABOUT REWARDS

\$ROMEODOGE Holders will receive BEP-20 i.e. Binance-Pegged version of these mentioned tokens.

What are Binance-Peg Tokens?

'Peg' means to tie the value of one crypto to another. The main purpose of these tokens is to allow trading of the assets in DEXes that is not currently possible due to their different blockchains.

Once rewards are sent to users. Users will be free to sell/swap the coin/token they have received as they desire.

AIRDROPS

### Taxes on Buying Romeo Doge

### Taxes on Selling Romeo Doge

**NOTE:** There are **NO** Taxes on transferring tokens from one address to another. Which means users are free to move their tokens to their desired wallets without any additional cost.

# Our Values

## TRANSPARENCY

Romeo Doge is decentralized and supported by its community of enthusiasts. We encourage open communication and believe trust, transparency, and community are the 3 pillars to building longevity.

## COMMUNITY

Romeo Doge has one of the fastest growing and most loved communities in crypto we believe that only together we are strong. Community is everything and Romeo Doge strives to include everyone from around the globe.

## TRUST

In cryptocurrency market trust is paramount. That means full transparency not only in the community and development but also in security efforts.

# Security

## **Locked Liquidity**

Initial liquidity will be locked for 12 months to provide holders with peace of mind that the token can always be exchanged. A trusted 3rd party, DXLock, will operate as the middle man to ensure that all raised liquidity is locked in a secure locker for the full timeframe.

## **Contract Audit Post Launch**

In an effort to increase transparency and ensure security, the team has purchased a top-tier audit with HASHEX. We'll be able to ensure no vulnerabilities can be found such as:

- Integer Overflow
- Integer Underflow
- Callstack Depth Attack
- Timestamp Dependency
- Parity Multisig Bug
- Transaction-Ordering Dependency

*The token contract is verified and available for viewing on [bscscan](#).*
